Important Information about SuccessMaker

SuccessMaker is the online computer program that our school district has purchased for the students to use this school year. The students need to use the program for three 20-minute sessions per week. We will do two sessions at school each week when we go to computer lab. **I need you to do at least one 20 minute session at home each week.**

Directions:
1) Go to ces.madisoncity.k12.al.us
2) Scroll to the bottom to find "Quick Links"
3) Click on the top link that says "SuccessMaker"
4) Click "Enter Here"
5) Your child needs to type their username. It is the same username you've been practicing for the computer lab.
6) Your child needs to type the password. The password is **abc123**
7) Your child can do a 20 minute math session the first week, then do a 20 minute reading session the next week. Keep rotating each week. OR Your child can do one 20-minute reading session and one 20-minute math session per week.

Your child needs to answer the questions during the session. Please do not answer questions for your child. All of my students are currently in the Initial Placement phase. This means that the program is deciding your child's level based on how your child answers the questions. So, please do not tell your child the answers to the questions. It is acceptable to show where to click if there is uncertainty.
