

Also known as **Parent Project® Junior**, *Loving Solutions* is a parent-training program designed specifically for parents raising difficult younger children, ages 5 to 10 years. This program utilizes the same principles found successful in Parent Project®, Sr., adapted to the needs and developmental level of younger children.

Using a behavioral model, *Loving Solutions* is also structured based on cooperative learning norms with group learning activities in a workbook format to maximize both learning and interest. The “Steps of Success” (S.O.S.) home practice assignments

create a solid foundation for change in the home.

***Loving Solutions* was designed, in part, to help combat the growing Elementary Truancy Crisis, while improving both school behavior and grades. To that end, a strong emphasis is placed on sleep, diet, structure, supervision, positive home/school communication, home learning activities, and developing homework behavior. The problem of Elementary Truancy lies squarely on the shoulders of parents. While it is true that some cases may require legal interventions, many more parents lack the understanding and skills necessary, to help their children succeed in school. The 2014 edition of *Loving Solutions* will help reduce the stress on parents, educators, and school staff.**

The *Loving Solutions* Teacher’s Guide is the most comprehensive in the industry. Icon driven, the guide walks facilitators through lectures, PowerPoint visuals and the group learning activities that provide parents with a clear understanding of the subject matter and a smooth process for change. *Like Parent Project, Sr., parents can take the *Loving Solutions* 10 week course for as little as \$20.00 per family.*

Loving Solutions also addresses the needs of children with Attention Deficit Disorder. The workbook provides a brief but informative introduction and overview of the field, to guide parents through this immense subject. Parents who suspect that their child displays these symptoms, as well as parents who have a child already diagnosed with ADD/ADHD, will find this information more than helpful.
